

FIRE PREVENTION CAPSULE

Before you light it, think safety!

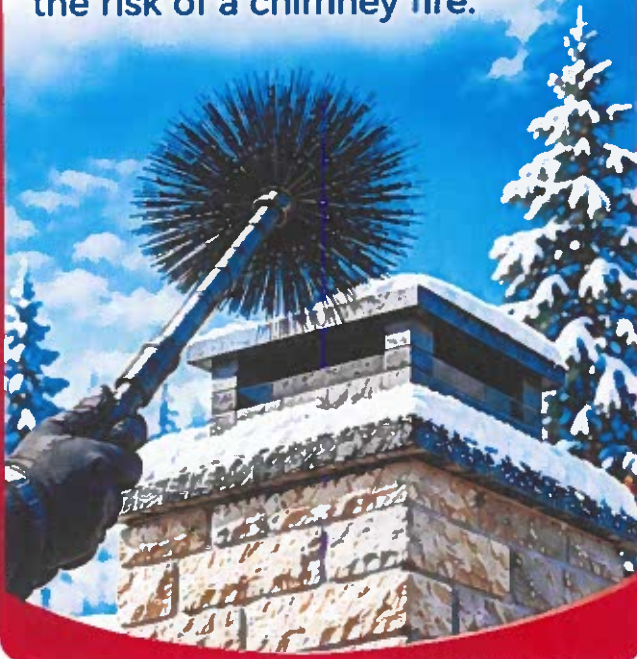

CHIMNEY CLEANING

Before the heating season, have your chimney inspected and cleaned by a professional when necessary.

Creosote buildup can increase the risk of a chimney fire.

CLEANING ELECTRIC BASEBOARDS

Use a vacuum cleaner to remove dust and hair inside and around the baseboard.

Do not leave any object, furniture or combustible material in front of or on the baseboard.

Clean the baseboard when it is cold and disconnected from power.

A little cleaning
CAN PREVENT A BIG FIRE!
