

Important Notice: Septic Tank Emptying Campaign

You will receive a letter from Enviro5 by the mail indicating an approximate date for your septic cleaning.

Septic system maintenance season has officially begun for the SOUTH SIDE of the municipality! To ensure your system works properly and to prevent sewage backups, please follow these important guidelines:

- Clear the covers: Your septic tank lids must be clearly visible and fully cleared (leave about 6 inches of free space all around).
- Mark the location: Place a stake or visible marker to help our team locate your system quickly.
- Secure the area: Make sure the path is accessible, dogs are tied up, and gates are unlocked.

Service Period: October and November 2026.

Thank you for your cooperation in keeping our systems safe and efficient!
